***35 U.S.C. 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claims 1 and 12, the claim mentions "reading bytes out of the cache memory or the main memory and forming each second word from them according to the control signal". The examiner wants to point out that it is not clear as to what from what is the second word being formed from. It should be pointed out or worded in the claim if the second word is being formed from the plurality of bytes. In another words, as recommended by the examiner, the claim should recite something on the lines of "reading bytes out of the cache memory or the main memory and forming each second word from the bytes according to the control signal". Further, claim 1 recites "forming each second word there from according to the control signal" which is not consistent with claim 12 which recites "forming each second word from them according to the control signal".

Appropriate correction is required.

*Allowable subject matter*

2. Claims 1 and 12 with all intervening claims would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
3. The examiner urges the applicant's to contact the examiner to expedite the process of this case, and full consideration will be given by the examiner.
